

INTRODUCING

# DREAM DRILLS PRO

SOLID CARBIDE HIGH-PERFORMANCE DRILLS

The New **GOLD STANDARD**  
in Holemaking From YG-1.

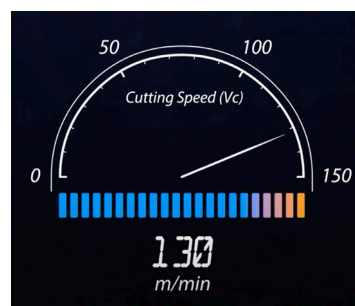

Now with higher cutting speeds for optimized performance in steel and cast iron, the new Dream Drills Pro sets a new standard for high-performance holemaking. With its micrograin carbide core strength, special coating and exceptional heat resistance, the Dream Drills Pro not only finishes the job faster, it can be counted on to outlast conventional drills.

CONVENTIONAL DRILL

Higher cutting speeds can be achieved with YG-1's Dream Drills Pro.

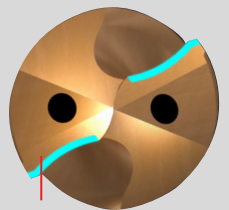

YG-1 DREAM DRILLS PRO

But that's just for openers. **Advanced geometry is really what makes the Dream Drills Pro the new standard in productivity.** From its optimal, 4-facet, wave-shaped cutting edge, to its 140-degree point angle, this drill delivers with less cutting force, excellent chip evacuation and higher speeds than conventional drills can come close to. Available in drilling depths of 3XD to 5XD, from .039" to .787"

Higher and improved cutting conditions with YG-1 special Z-Coating technology

Wave shape cutting edge provides improved chip formation and low cutting force

Micro-grained carbide core to achieve excellent wear resistance and maximum tool life
